

ExpectID®

Streamline customer acquisition, deter fraud and drive revenue

IDology's ExpectID platform delivers on-demand and completely configurable identity verification solutions that match your level of risk. With more interconnected layers you can close the gaps that are exploited by fraudsters and eliminate the need for different vendors. Powerful, fully-integrated layers connect relevant customer information, scattered across public and proprietary data sources, to provide a holistic picture of your customer. With actionable insights, you are empowered to fast-track decision-making for

trusted identities and apply additional verification measures only as needed.

Our multi-layered approach ensures you have more inclusive ways to deliver the right verification experience at the right time. Customize and automate the verification experience to fit your business need, meet ever-evolving compliance standards, prevent fraud and avoid regulatory fines — all while delivering a dramatically better customer experience.

Solution Features

Multi-layered identity verification

Get the identity assurance you need with a layered approach to support different levels of risk in a customer-friendly way.

Flexible on-demand configuration

Customize your decisioning criteria and multi-layered workflows with point-and-click flexibility based on your own unique approach to risk.

Integrated omnichannel solutions

Engage customers across any channel and device with data, ID and biometric solutions delivered individually or orchestrated through a custom workflow.

Industry-leading technology

Harness our intelligent orchestration, which brings together proprietary tech and global identity data to deliver meaningful and actionable insights.

Why IDology?

Modernize your onboarding experience

Sign up more real customers faster and with less risk across all channels with flexible, on-demand configuration and automated approvals.

Drive revenue and decrease costs

Fine tune your verification processes and risk appetite with full data and decision transparency to drive more conversions and less fraud.

Locate and approve more customers

Increase your market share of thin-file and hard-to-identify populations with thousands of diverse, authoritative data sources, IDs and biometrics.
